CLEAR FILTERS

Blood Spot Screening | **CCHD Screening** | **Contact Us/Resources**

Definition: Any specimen that is collected five hours before the hospital specific courier pick up time should be sent with the courier that day and will be received in the lab on the following day. The appropriate day a specimen should be received is calculated for each specimen depending on the hospital specific pick-up time.

Blood Spot Screening | **CCHD Screening** | **Contact Us/Resources**

Definition: The BioTrust consent form is attached to the back of the NBS card. Parent completion of the form is necessary to ensure that they have an opportunity to decide how their child's blood spots can be used after newborn screening is done. A consent form is considered complete if either the "yes" or "no" box is checked and a parent/legal guardian's signature is affixed.
